TRL WELCOMES FIVE NEW PARTNERS TO SCIENCE OF READING CAMPAIGN

The Reading League is proud to announce that five additional organizations are now Science of Reading campaign partners. They join us in our shared mission to invest in knowledge-building for all educators, anchor reading instruction in the scientific evidence base, and abandon practices that lack evidence of effectiveness for all learners.

As a partner of the Science of Reading campaign, they will work with us to raise awareness and drive action through activities that will support this mission.

“At TRL, we know that literacy is one of the greatest ways to positively impact the trajectory of someone’s life, and we know that we are not alone in this belief,” said Maria Murray, president of The Reading League. “We are thankful for the support from our growing base of partners, members and chapters as we work to build a national pipeline of diverse stakeholders to help schools, teachers, and learners achieve greater success through the Science of Reading.”

We welcome our new partners:

- [BrainsRead](#) works to empower teachers with the knowledge and skills in the science of reading and structure of the language so that they will be equipped to empower each reader in the classroom.
- [Glean Education](#) partners with schools, districts, & states to build knowledge of literacy best-practices, supporting struggling learners, data-based decision making, and MTSS/RTI implementation.
- [International Dyslexia Association](#) works to create a future for all individuals who struggle with dyslexia and other related reading differences.
- [Reading Simplified](#) supports teachers and parents to streamline reading instruction and accelerate readers' achievement.
- [The Reading Teacher's Top Ten Tools](#) is an online reading course based upon a firm foundation of proven knowledge and pedagogy, research, and practice that truly informs the daily work teachers do to teach their students to read.

Thank you to our continuing partners: [Decoding Dyslexia CA](#), [Decoding Dyslexia MD](#), [Mindplay](#), [Evidence-Based Literacy Instruction](#), [ReadWa](#), and [Barksdale Reading Institute](#).
