

Rhode Island Science of Reading and Structured Literacy: Resource Bank for Syllabi Refinement

JANUARY 2022

Welcome! This resource bank supplements the **Rhode Island Science of Reading and Structured Literacy Syllabi Refinement Tool** with materials for supporting coursework and professional development in literacy. The identified resources align with the competencies and components of instruction required to develop a proficient level of knowledge in the Science of Reading and Structured Literacy within the [Rhode Island Right to Read Act](#). This law requires educators to exhibit either *proficiency* in or *awareness* of the knowledge and practices of the Science of Reading and Structured Literacy as defined below.

- The **Science of Reading**, or *scientific reading instruction*, is defined as empirically-based instruction that is grounded in the study of the relationship between cognitive science and educational outcomes.
- **Structured Literacy** is defined as an approach to teaching that integrates speaking, listening, reading, and writing by providing explicit, systematic, diagnostic-prescriptive instruction in phonological and phonemic awareness, sound-symbol correspondence (phonics), syllables, morphology, semantics, and syntax. For more information, visit [RIDE's Structured Literacy page](#).

Rhode Island educator preparation programs (EPPs), districts/schools, and professional development providers can use this resource bank to build the capacity of educators to understand and apply components of effective research-aligned literacy instruction.

- **For EPPs:** These resources can be used to support coursework in identified areas of need following completion of the accompanying syllabi refinement tool.
- **For districts/professional development providers:** The resources and tools can be used to help strengthen professional learning among educators for each Rhode Island competency.

For resources that are universally available and accessible online, links have been provided. Other resources (books, journal articles) have been listed with descriptive information and citations. For additional aligned training and resources, please take the RIDE Science of Reading and Structured Literacy Awareness Courses (1-5) on [BRIDGE-RI](#).

The development of this tool was led by Dr. Stephanie Stollar at Mount St. Joseph University, with support from the following Rhode Island CEEDAR Literacy/Dyslexia Workgroup members:

Kari Kurto, Rhode Island Department of Education

Dr. Natasha Feinberg, Rhode Island College

Kirsten LaCroix, Center for Leadership & Educational Equity

Dr. Cara McDermott-Fasy, Rhode Island College

Dr. Danielle Dennis, The University of Rhode Island

Abigail Foley, CEEDAR Center/American Institutes for Research

Resource Bank for Syllabi Refinement

Competency I: Demonstrate and apply foundational knowledge of the science of reading development and reading difficulties derived from interdisciplinary research with special emphasis on language/literacy needs of students with dyslexia and other language-based learning disabilities
